

Paper Roll Penguin

- What you'll need:
- Toilet paper tube
 - Construction paper – (black, orange, yellow and white)
 - Scissors
 - Glue
 - Stapler
 - Tape
 - Wiggle eyes (optional)

1.

Cover the toilet paper tube with black construction paper. Then, cut a strip of black paper that wraps around the tube and staple or glue it to the tube.

2.

Leave about 1 inch above the top of the roll and one inch overlapping on the roll. Cut down into the top inch of the paper, creating fringe for hair.

3.

Cut eyes out of black and white construction paper or add wiggle eyes to the penguin's face.

4.

Cut a beak out of yellow construction paper and tuck it under the hair layer of paper.

5.

Cut the feet out of orange construction paper. Next, crease the straight end of the feet and tape the folded flap to the inside of the tube.

6.

Cut out white stomach piece and glue onto the tube.

7.

Cut two wings out of black construction paper. Then, tuck the wings under the same hair layer.

Your penguin is finished!
Enjoy!
