

SNOWMAN PAINT STICK

What You'll Need:

- Paint stir stick
- White paint
- Glue
- Scissors
- Construction paper in various colors
- Permanent markers in red and black

1. Cover both sides of the paint stir stick with white paint. Allow to dry.

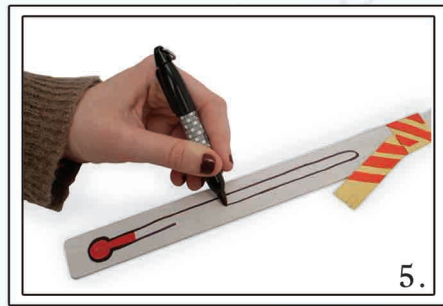

2. Cut out two pieces of construction paper for the scarf. Then, cut fringe in one of the first piece and glue it at an angle to the paint stick. Glue the second piece over that to create your scarf.

3. Draw your snowman's face on with permanent marker.

4. Cut a trapezoidal shape out of orange construction paper for the snowman's nose. Then, roll it into a carrot like shape, gluing it secure. Finally, glue the non-pointed end to the paint stick.

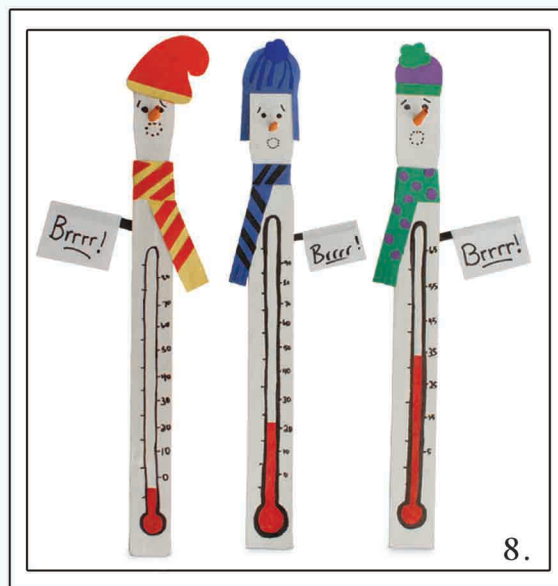

5. Draw a thermometer on the paint stick with black permanent marker. Then, draw your temperature in with red permanent marker. Label with temperatures.

6. Cut out a hat out of construction paper. Glue to the top of the paint stick. (Optional: glue two colored cotton balls to either side of the paint stick to create earmuffs).

7. Cut a small, thin piece of black construction paper. Then, cut a piece of white construction paper, write your message on it and glue it to the thin piece of black construction paper. Finally, glue both pieces to the back of the snowman to create your own custom message.

8. Your snowman is finished – enjoy!
